ScreenBeam™ *Pro*

Beam your Screen to your HDTV

Model# SBWD100A

Enjoy All of your Favorite Content on your HDTV or HD Projector

With ScreenBeam Pro, you can enjoy your favorite videos, photos and movies on the best high-definition display in the house. Connect the Receiver to your HDTV and you can wirelessly display content from a compatible Intel WiDi or Wi-Fi Miracast laptop, tablet, or smartphone to your HDTV. That means you can sit back and watch movies from Netflix, Hulu, Amazon, or YouTube on your HDTV. You can share your vacation photos and videos with the entire family, without having to huddle around a tiny screen.

Optimized for Intel WiDi 4

ScreenBeam Pro can mirror or extend content from Intel WiDi devices, including Intel's 4th Gen Ultrabooks. With support for Intel WiDi 4, you'll enjoy all the advantages of Intel's latest wireless display technology including ultra-low latency, excellent video quality up to 1080p HD and even 3D*, compatible with premium protected content, works with USB devices**over wireless and more.

intel WiDi Wireless Display | **Wi-Fi CERTIFIED®** | **HDMI™** HIGH DEFINITION MULTIMEDIA INTERFACE | **1080p HD** HIGH DEFINITION

*Sterescopic 3D supports half-res side-by-side and top-and-bottom 3D formats. Requires system with 3D Blu-Ray media player.
**USB devices are not included. USB over network (UoIP) feature supports USB HID keyboard, mouse, and storage.

Compatible with Wi-Fi Certified Miracast Devices

The ScreenBeam Pro is based on the Wi-Fi Certified Miracast standard that simplifies discovery and setup, so you can easily mirror content from one device to an HDTV the home or office. Annual shipments of Wi-Fi Certified Miracast devices are projected to top 1.5 billion in 2016… that's a lot of interoperable devices.

Brilliant Audio and Video Experience

Movies, videos, and photos will come alive on the big screen with support for up to 1080p full HD video and audio. With ScreenBeam Pro, you'll enjoy great picture and sound. And ScreenBeam Pro supports all the performance improvements of WiDi 4.0 for smoother video, better color and better image quality.

Better Quality with ScreenBeam Pro Specific Wireless Network

ScreenBeam Pro forms a dedicated wireless connection to your device and does not require an existing wireless network or line of site. This means you can stream HD content with ScreenBeam Pro without impacting the Wi-Fi network you use for social networking, voice, data, and more. Likewise, your Internet video streaming experience won't be subject to frequent hiccups, congestion, or slow-downs in your Wi-Fi network.
